## 6. METHODOLOGY & FRAMEWORK

### 6.1 AGILE METHOD

Based on the client requirement & type of the project we prefer to go with the appropriate project execution methodologies & approach. It helps with the development of high-quality IT products that meet or exceed customer expectations, reaches completion within times & cost estimates.

#### WHEN TO USE:

- Few Initial Product & Regulatory Requirements
- Lenient Processes in Place
- High Product Owner Involvement
- Innovative product development from scratch
- Short, Flexible Timeline
- Budget with Wiggle Room

## 6.2 WATERFALL METHOD

The Waterfall methodology is the traditional and the most common methodology used for project management. It follows a sequential, linear process which is why it is often described as a “linear-sequential life cycle model”.

### WHEN TO USE:

- Many Initial Product Requirements & Strict Regulatory Requirements
- Strict Processes in Place
- Low Product Owner Involvement
- Enhancement to an Existing Product
- Fixed & Firm Timeline
- Fixed, Inflexible Budget

## 7. ENGAGEMENT PRACTICES

FIXED COST	HOURLY MODEL
 <p>If your company or you have a fixed set of software development requirements or ideas for creating new solutions or services, then the fixed cost model will be the best suited for you.</p>	 <p>If you or your company has software development requirements that would demand adopting changes and flexibility, then the hourly model is best suited for you.</p>
T & M MODEL	PARTNER WITH US
 <p>You can hire our dedicated resources as well. They will only be working on your project. A daily timesheet of your work will also be submitted to you. Even though you hire dedicated resources.</p>	 <p>You can also partner with us for your growth and diversification on a mutual benefit basis. We will give you qualified and experienced professionals with sound domain knowledge.</p>
